

## How to use Thonny Python IDE to write a program?

1. Open “Application Menu”, Select “Programming” → “Thonny Python IDE”.

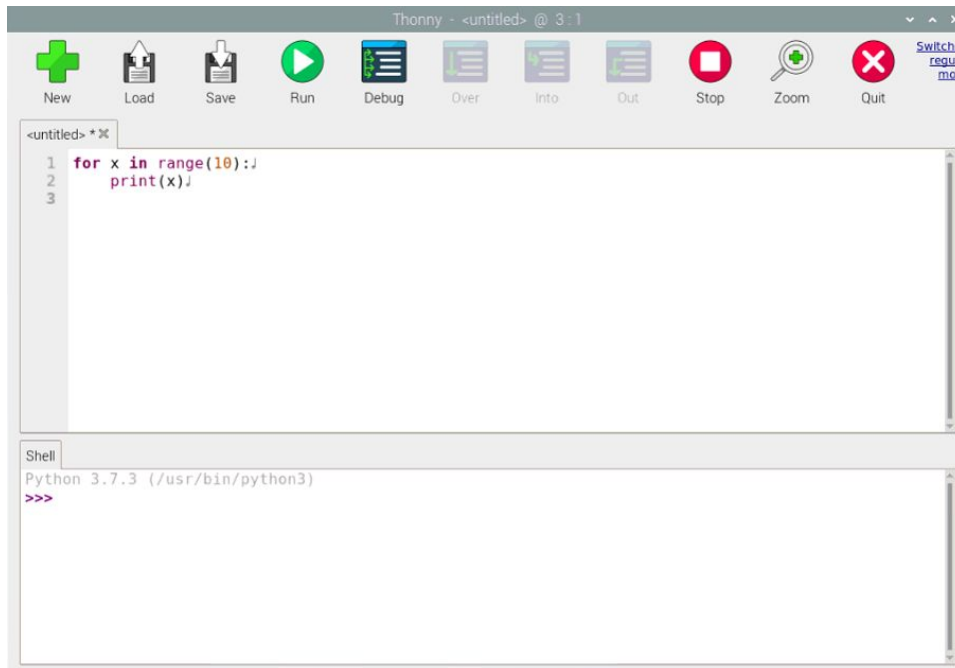

2. The Thonny Python IDE interface should look like this.

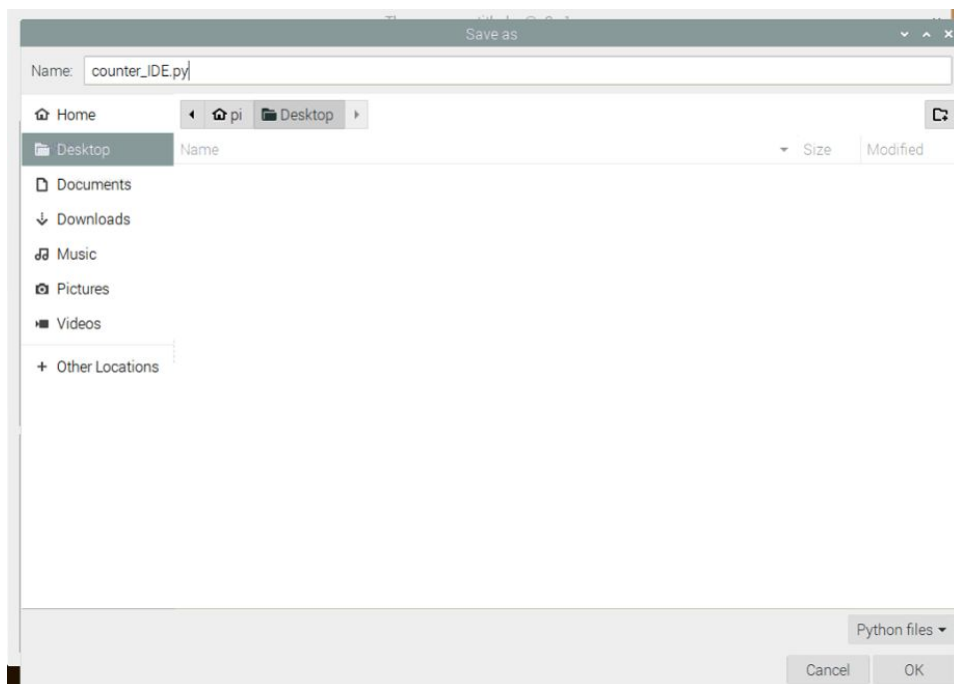

3. Try to write a simple program using Thonny Python IDE. Create a sequence of numbers from 0 to 9, and print each item in the sequence using the following loop:

```
for x in range(10):  
    print(x)
```

4. Click “**Save**” on the top navigation bar. Select “**Desktop**”, name it `counter_IDE.py` and click “**OK**”.

5. Click “**Run**” on the top navigation bar. You should be able to see the following.
